worried about fine lines and wrinkles around your smile?

ask about Botox and Dermal Filler treatments available at this office

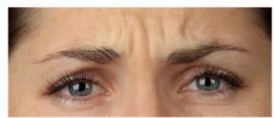

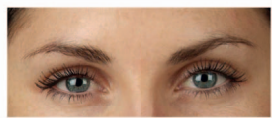

What causes wrinkles?

Dynamic wrinkles are caused by contraction of delicate facial muscles when smiling, squinting, frowning and smoking. These lines can give a person an angry, tired or sad appearance, even when not expressing that emotion.

Today you can benefit from 2 of the most popular FDA approved wrinkle fighters, Botox® and Juvederm, to prevent and alleviate signs of aging.

What is the difference between Botox® and Juvederm?

Depending on your desired result, your doctor will use Botox®, Juvederm or a combination of both to enhance your appearance. Botox® relaxes facial muscles to prevent new wrinkles from forming and Juvederm is used to instantly fill and smooth out existing wrinkles and folds.

frequently asked questions

Are treatments painless?

Dental practitioners are experts in injections and anesthetic techniques resulting in no pain or minimal discomfort during treatments.

How long do the treatments last?

Depending on the area treated, Juvederm can last up to 6 months or longer. Botox® can last 3-6 months, sometimes longer.

How long are treatments?

Procedures are brief and only take 10-25 minutes depending on treatment(s).

Are Botox® and Juvederm treatments safe?

Botox® is one of the safest cosmetic procedures available, only a small amount is used when doing the procedure. Juvederm is a hyaluronic acid, which is produced naturally in your own body.
